

State One-Call Center Administrator,

As the state One-Call Center, you are a key partner for pipeline operators who operate in the state in providing and supporting pipeline safety.

As members of the One-Call system, a group of operators who work collaboratively to provide safety communications to stakeholders would like to provide you with a copy of the safety communication provided to Excavators and Contractors in your state.

**The enclosed communication provides the key and required safety messages to Excavators and Contractors including:**

- How to learn the One-Call laws in your state
- How to use 811 before excavating
- Importance of respecting utility markings
- Understanding tolerance zones
- Leak recognition indications
- The importance of reporting possible leaks and/or damages to pipelines
- How to report damages and/or possible leaks to pipelines
- Possible hazards of a product release

If you have any questions regarding the messages or those who participate in this specific effort, you can contact us by visiting [www.pipelinesafetyinfo.com](http://www.pipelinesafetyinfo.com).
